2324 Killearn Center Blvd.
Tallahassee, FL 32309

To: WINASAP Users
Product: WINASAP2003
Version: 5.16
Download Size: 14 MB
Date: June 25, 2009
Release Date: July 7, 2009
Updated Release Notes: February 23, 2010

WINASAP2003 v.5.16 includes the following corrections and enhancements:

- A tab was created to display the report for claims with “Submitted” status.
- Revised the spelling from “Sumitted” to “Submitted” on the drop down for Claim Status on the Dental Claims screen.
- When the status of a claim is “Accepted”, it can now be changed to “Paid”.
- When the status of a claim is “Submitted”, it can now be changed to “Paid”.
- A claim with the status of “Keyed” can now be changed to “Hold” and vice versa.
- A check box was added to allow sorting in the Claim Status Listing. It will sort alphabetically based on the patient's name.
- The PRV segment will now be created on the 2000A loop whenever the taxonomy code for the Billing, Pay-to and Rendering provider are the same. However, if you are going to restore a database from an older version and try to copy a claim and save it, the update would not be applied. In order for the update to be work on a copied claim from a previous database, you should do the following:

After copying a claim, you have to change the Billing, Pay-to and Rendering Provider to a different value and then save it. Open again the claim and just return the original values of the Billing, Pay-to and Rendering Provider and then save. The update would now be applied and the PRV segment would now be created on the 2000A loop whenever the Billing, Pay-to and Rendering are the same.

Instructions:

1. Go to www.acs-gcro.com.
2. You will see: **WINASAP2003 version 5.16 is now available for download.**
[Click here to download.](#)
